

Company Description

Digiflux Technologies Private Limited, based in Vadodara, is a leading provider of comprehensive digital solutions. We specialize in developing Web and Mobile Applications, as well as delivering innovative end-to-end digital solutions tailored to various organizational needs.

Role Description

We are looking for a **Mobile Application Developer (React Native)** with **3–4 years of experience** to join our team in Vadodara. This is a full-time, on-site role. The ideal candidate will have strong expertise in developing high-quality cross-platform mobile applications for Android and iOS using React Native. You will be responsible for building scalable, user-centric applications, integrating APIs and third-party services, optimizing performance, and collaborating with cross-functional teams to deliver robust mobile solutions. A strong understanding of mobile application architecture, clean coding practices, and excellent English communication skills are essential for this role.

Key Responsibilities

- Design, develop, and maintain high-performance mobile applications using React Native for both Android and iOS platforms.
- Build responsive, intuitive, and user-friendly mobile interfaces while optimizing application performance across various devices.
- Integrate RESTful APIs, third-party libraries, and backend services into mobile applications.
- Collaborate with UI/UX designers, backend developers, QA engineers, and project managers to deliver high-quality solutions.
- Write clean, maintainable, reusable, and well-documented code following industry best practices.
- Debug, troubleshoot, and resolve application issues to ensure smooth functionality and reliability.
- Implement and manage state management solutions such as Redux, Zustand, or Context API.
- Conduct unit, integration, and device testing to ensure application quality and stability.

- Understand project requirements, provide effort estimations, and plan development tasks for timely delivery.
- Develop and maintain features such as **push notifications, deep linking, and in-app purchases**.
- Follow **mobile application security best practices** to build secure and reliable applications.
- Utilize **AI-powered development tools** such as **Cursor** and **Claude Code** to improve development efficiency, debugging, code quality, and documentation.
- Stay updated with the latest mobile technologies, frameworks, and best practices to continuously improve application performance and development processes.

Qualifications

- 3–4 years of hands-on experience in React Native mobile application development.
- Strong proficiency in JavaScript/TypeScript and the React Native ecosystem.
- Experience integrating RESTful APIs and third-party services.
- Solid understanding of mobile application architecture, performance optimization, and offline storage.
- Familiarity with native development tools such as Xcode and Android Studio.
- Strong debugging, analytical, and problem-solving skills.
- Bachelor's degree in Computer Science, Information Technology, or a related field, or equivalent practical experience.

Good to Have

- Familiarity with cloud services such as AWS or Firebase for backend integration.
- Understanding of CI/CD pipelines for mobile application deployment.
- Experience with Google Play Store and Apple App Store submission processes.
- Experience mentoring junior developers or leading small project teams.
