

Company Description

Digiflux Technologies Private Limited, based in Vadodara, is a leading provider of comprehensive digital solutions. We specialize in developing Web and Mobile Apps, as well as delivering innovative end-to-end digital solutions tailored to various organizational needs.

Role Description

We are seeking a **DevOps Engineer** with 2 to 4 years of experience to join our technical team. The successful candidate will be responsible for the end-to-end management of cloud infrastructure, the automation of deployment cycles, and the maintenance of scalable CI/CD pipelines. This role requires a professional capable of making informed architectural decisions to ensure system efficiency and cost-effectiveness.

Key Responsibilities

- Design, implement, and maintain automated CI/CD pipelines to facilitate seamless code deployment.
- Manage and optimize cloud infrastructure, including EC2, RDS, VPC, Lambda, and AWS Batch functions.
- Oversee containerization and orchestration processes using Docker and ECS.
- Manage multiple cloud accounts while ensuring rigorous cost optimization and resource efficiency.
- Develop and maintain comprehensive cloud architecture diagrams and technical documentation.
- Contribute to infrastructure planning to ensure high availability, scalability, and performance.

Technical Qualifications

- 2-4 years of professional experience in DevOps with a focus on automated CI/CD and cloud services.
- Cloud Proficiency: Practical knowledge of cloud services including VPC, EC2, RDS, and serverless functions (Lambda/Batch).
- Experience with Infrastructure as Code (IaC) tools such as Terraform or AWS CloudFormation
- Basic experience in backend technologies and database management skills (DB Admin)
- Orchestration: Hands-on experience with Docker and container orchestration tools like Kubernetes and ECS.
- Architectural Knowledge: Strong understanding of cloud architecture and the ability to prepare detailed infrastructure diagrams.
- Bachelor's degree in Computer Science, Information Technology, or a related field.

Preferred Skills

- Familiarity with monitoring and observability tools such as Grafana and Prometheus.
- Experience in infrastructure load testing using JMeter.
- Proven ability to implement cost-effective cloud infrastructure plans.

Additional Information

- The role is based in Vadodara and requires a full- time on-site presence.
- Opportunities for professional growth and development within a dynamic and innovative company.
